

Schriftenverzeichnis

Lehrbücher und Monographien

1. K. Bögel & M. Tasche, Analysis in normierten Räumen, Akademie-Verlag, Berlin, 1974 (395 S.).
2. M. Tasche, Funktionalanalytische Methoden in der Operatorenrechnung, Nova Acta Leopoldina (N.F.), Nr. 231, Bd. 49 (1978) (95 S.).
3. G. Steidl & M. Tasche, Schnelle Fourier-Transformationen – Theorie und Anwendungen, Lehrbriefe der FernUniversität Hagen (421 S.), 1998.

Unselbstständige Schriften

1. M. Tasche, Über Funktionen, die Δ^2 -stetig bzw. stetig von 2. Ordnung sind, Stud. Sci. Math. Hung. 4 (1969), 191 – 194.
2. M. Tasche, Über den Raum der Δ^2 -stetigen Funktionen, Publ. Math. 16 (1969), 133 -139.
3. M. Tasche, Algebraische Operatorenrechnung für einen rechtsinvertierbaren Operator, Wiss. Z. Univ. Rostock, Naturwiss. Reihe 23, M 9 (1974), 735 – 744.
4. M. Tasche, Abstrakte Differentialgleichungen mit algebraischen Operatoren, Wiss. Z. Univ. Rostock, Naturwiss. Reihe 24, M 10 (1975), 1231 – 1236.
5. M. Tasche, Operatorenrechnung in einer Algebra, Beitr. Analysis 9 (1976), 125 – 130.
6. M. Tasche, Abstrakte lineare Differentialgleichungen mit stationären Operatoren, Math. Nachr. 78 (1977), 21 – 36.
7. M. Tasche, Randprojektoren und Greensche Operatoren von abstrakten Randwertproblemen und deren Anwendung, Z. Angew. Math. Mech. 57 (1977), 579 – 589.
8. I. Reckziegel & M. Tasche, Eine verallgemeinerte Inverse eines Matrizenpolynoms, Rostocker Math. Kolloq. 9 (1978), 43 - 60.
9. M. Tasche, On degenerate operator equations, in: I. Dimovski (Ed.), Generalized Functions and Operational Calculus, Sofia 1979, 205 – 210.
10. M. Tasche, Zur Konvergenzbeschleunigung von Fourierreihen, Math. Nachr. 90 (1979), 123 – 134.

11. M. Tasche, Some constructions of right inverses and generalized inverses, in: G. Anger (Ed.), *Inverse and Improperly Posed Problems in Differential Equations*, Berlin 1979, 259 – 269.
12. M. Tasche & B. Wrase, Über lineare Differentialgleichungen gebrochener Ordnung und verallgemeinerte Abelsche Integralgleichungen, *Demonstr. Math.* 12 (1979), 803 – 820.
13. I. Reckziegel & M. Tasche, Über die Lösung entarteter Operatorgleichungen mit Matrixkoeffizienten, *Rostocker Math. Kolloq.* 13 (1980), 81 – 96.
14. M. Tasche, Operational calculus for a selfadjoint operator with pure point spectrum, *Wiss. Beitr. Ernst-Moritz-Arndt-Univ. Greifswald, Proceedings of the Conference on Topology and Measure II, Part 1* (1980), 163 – 168.
15. M. Tasche, Eine einheitliche Herleitung verschiedener Interpolationsformeln mittels der Taylorschen Formel der Operatorenrechnung, *Z. Angew. Math. Mech.* 61 (1981), 379 – 393.
16. H. Andres, W. Kung & M. Tasche, Einige Anwendungen der W-Transformation und der Moore-Penrose-Inversen in der finiten Systemtheorie, *Z. elektr. Inform. Energietechn.* 11 (1981), 385 – 398.
17. M. Tasche, A unified approach to interpolation methods, *J. Integral Equations* 4 (1982), 55 – 75.
18. J. Prestin & M. Tasche, Fourier operational calculus. *Serdica* 9 (1983), 309 – 320.
19. R. Creutzburg & M. Tasche, Zahlentheoretische Transformationen und primitive Einheitswurzeln in einem Restklassenring modulo m , *Rostocker Math. Kolloq.* 25 (1984), 4 – 22.
20. R. Creutzburg & M. Tasche, Zahlentheoretische Transformationen und primitive Einheitswurzeln in einem Restklassenring modulo m , II, *Rostocker Math. Kolloq.* 26 (1984), 103 – 109.
21. R. Creutzburg & M. Tasche, F-Transformationen und Faltung in kommutativen Ringen, *Elektr. Inform. Verarb. Kybern.* 21 (1985), 129 – 149.
22. K. Gürlebeck, W. Sprößig & M. Tasche, Numerical realization of boundary collocation methods, in: W. Schempp & K. Zeller (Ed.), *Multivariate Approximation Theory III*, ISNM 75, Birkhäuser-Verlag 1985, 206 – 217.
23. M. Tasche, Accelerating convergence of Fourier expansions, in: M. Kisielewicz (Ed.), *Functional-Differential Systems and Related Topics IV*, Zielona Gora 1985, 121 – 129.
24. R. Creutzburg & M. Tasche, Construction of moduli for complex numbertheoretic transforms, *Publ. Math.* 33 (1986), 162 – 164.
25. R. Creutzburg & M. Tasche, Number-theoretic transforms of prescribed length, *Math. Comput.* 47 (1986), 693 – 701.

26. G. Drauschke & M. Tasche, Prime factorizations for the values of cyclotomic polynomials in $\mathbb{Z}[i]$, *Arch. Math.* 49 (1987), 292 – 300.
27. G. Berger & M. Tasche, Hermite–Lagrange interpolation and Schur’s expansion of $\sin \pi x$, *J. Approximation Theory* 53 (1988), 17 – 25.
28. G. Steidl & M. Tasche, Exact deconvolution using number–theoretic transforms, *Comput. Math. Appl.* 15 (1988), 757 – 768.
29. R. Creutzburg & M. Tasche, Parameter determination of complex number–theoretic transforms using cyclotomic polynomials, *Math. Comput.* 52 (1989), 189 – 200.
30. J. Prestin & M. Tasche, Trigonometric interpolation for bivariate functions of bounded variation, In: Z. Ciesielski (Ed.), *Approximation and Function Spaces*, Banach Center Publications, Vol. 22, Warsaw 1989, 309 – 321.
31. G. Steidl & M. Tasche, On a number–theoretic result of Sylvester–Kronecker–Zsigmondy, *Math. Nachr.* 140 (1989), 233 – 247.
32. G. Steidl, M. Hänler & M. Tasche, On a number–theoretic result of Zsigmondy in domains of quadratic integers, *Arch. Math.* 53 (1989), 30 – 39.
33. G. Steidl & M. Tasche, Index transforms for multidimensional DFT’s and convolutions. *Numer. Math.* 56 (1989), 513 – 528.
34. G. Steidl & M. Tasche, Index transforms for multidimensional DFT’s, in: C. K. Chui, W. Schempp & K. Zeller (Ed.), *Multivariate Approximation Theory IV*, ISNM 90, Birkhäuser–Verlag Basel 1989, 321 – 328.
35. R. Creutzburg & M. Tasche, Number-theoretic transforms of prescribed length, in: *EUROCAL 87*, *Lecture Notes in Comput. Sci.* 378, Springer–Verlag, 1989, 161 – 162.
36. G. Steidl & M. Tasche, Fast algorithms for one– and twodimensional discrete cosine transforms, in: W. Haußmann & K. Jetter (Ed.), *Multivariate Approximation and Interpolation*, ISNM 94, Birkhäuser–Verlag, Basel 1990, 285 – 298.
37. G. Steidl & M. Tasche, Polynomial approach to fast algorithms for discrete Fourier–cosine– and Fourier–sine–transforms. *Math. Comput.* 56 (1991), 281 – 296.
38. M. Tasche, G. Steidl & R. Creutzburg, Number-theoretic transforms and a theorem of Sylvester–Kronecker–Zsigmondy, in: A. Pethö, M. Pohst, H.C. Williams & H.G. Zimmer (Ed.), *Computational Number Theory*, de Gruyter, 1991, 45 – 51.
39. M. Tasche, Accelerating convergence of univariate and bivariate Fourier approximations. *Z. Anal. Anwend.* 10 (1991), 239 – 250.
40. M. Tasche, Konstruktion schneller Algorithmen für diskrete Fouriertransformationen. *Rostocker Math. Kolloq.* 44 (1991), 99 – 112.
41. G. Plonka & M. Tasche, Efficient algorithms for periodic Hermite spline interpolation, *Math. Comput.* 58 (1992), 693 – 703.

42. G. Plonka & M. Tasche, Periodic wavelets, Preprint 93/11, Univ. Rostock, 1993.
43. M. Tasche, Fast algorithms for discrete Chebyshev–Vandermonde transforms and applications, *Numer. Algorithms* 5 (1993), 453 – 464.
44. G. Baszenski & M. Tasche, Fast algorithms for simultaneous polynomial approximation, in: K. Jetter & F.I. Utreras (Eds.), *Multivariate Approximation: From CAGD to Wavelets*, World Scientific Publ., Singapore, 1993, 1 – 16.
45. M. Tasche, Mathematische Grundlagen der Bilddatenkompression, Anhang in H. Meissner, *Digitale Multimediasysteme*, Verlag Technik, Berlin, 1994, 153 – 175.
46. M. Tasche, Periodic spline wavelets and discrete Fourier transforms, in: C. Moraga, Z. Gongli, L. Zhongkan, L. Xinping & R. Xuefang (Eds.), *Proceedings of 5–th International Workshop on Spectral Techniques*, Beijing, 1994, 188 – 194.
47. G. Plonka & M. Tasche, Cardinal Hermite spline interpolation with shifted nodes, *Math. Comput.* 63 (1994), 645 – 659.
48. G. Plonka & M. Tasche, A unified approach to periodic wavelets, in: C.K. Chui, L. Montefusco & L. Puccio (Eds.), *Wavelets: Theory, Algorithms, and Applications*, Academic Press, Boston, 1994, 137 – 151.
49. M. Tasche, Orthogonal periodic spline wavelets, in: P.J. Laurent, A. Le Méhauté & L.L. Schumaker (Eds.), *Wavelets, Images, and Surface Fitting*, A K Peters, Wellesley, 1994, 475 – 484.
50. G. Baszenski & M. Tasche, Fast DCT–algorithms, interpolating wavelets and hierarchical bases, in: P.J. Laurent, A. Le Méhauté & L.L. Schumaker (Eds.), *Wavelets, Images, and Surface Fitting*, A K Peters, Wellesley, 1994, 37 – 50.
51. G. Plonka & M. Tasche, On the computation of periodic spline wavelets, *Appl. Comput. Harmonic Anal.* 2 (1995), 1 – 14.
52. G. Baszenski, F.-J. Deltos & M. Tasche, A united approach to accelerating trigonometric expansions, *Comput. Math. Appl.* 30 (1995), 33 – 49.
53. M. Tasche, Polynomial wavelets on $[-1, 1]$, in: S.P. Singh (Ed.), *Approximation Theory, Wavelets and Applications*, Kluwer Academic Publ., Dordrecht, 1995, 497 – 512.
54. D. Potts & M. Tasche, Interpolatory wavelets on the sphere, in: C.K. Chui & L.L. Schumaker (eds.), *Approximation Theory VIII, Vol. 2: Wavelets and Multilevel Approximation*, World Scientific Publ., Singapore, 1995, 335 – 342.
